

RuralAI — Demo Patient Registration Sheet

Enter exactly these values at **Register Patient** and **New Visit** → **Assessment**. Field names match database/v2/02_schema.sql. All identities are fictional.

Matches prescription + lab report set 1–4

Rx dates: 18 / 22 / 27 / 29 Aug 2026

FIELD (column)	PATIENT 1 — Diabetes / HTN	PATIENT 2 — Paediatric GE	PATIENT 3 — Post-partum anaemia	PATIENT 4 — Pulmonary TB
A — PATIENT REGISTRATION (table: patients)				
Aadhaar Number aadhaar_number — PK, 12 digits	1002 4419 7301	1002 1188 1204	1002 4471 2932	1002 0417 0945
Full Name full_name	Ram Naresh Yadav	Anjali (Kumari Anjali on Rx)	Rehana Bano	Suresh Kumar Patel
Gender gender — enum	male	female	female	male
Date of Birth date_of_birth — age is DERIVED	12 / 01 / 1958 → 68 yrs	09 / 11 / 2021 → 4 yrs	03 / 04 / 1994 → 32 yrs	21 / 07 / 1981 → 45 yrs
Village / Address 1 village_line1	Vill. Bhainsaha	Vill. Belhari Khurd	Vill. Kurwar	Vill. Dhanpatganj
Address line 2 village_line2 — optional	Post Kurwar, Blk. Dhanpatganj	Post Belhari, near Sub-centre	W/o Mohd. Irshad, Post Kurwar	Post Kurwar, Blk. Belhari
District address_district	Sultanpur	Sultanpur	Sultanpur	Sultanpur
State address_state_id	Uttar Pradesh	Uttar Pradesh	Uttar Pradesh	Uttar Pradesh
PIN Code pin_code — ^[1-9][0-9]{5}\$	228145	228151	228145	228151
Mobile Number phone — ^[6-9][0-9]{9}\$	9000000001	9000000002 (mother — Sunita Devi)	9000000003	9000000004
ABHA Number abha_number — optional / OCR	Leave blank	Leave blank	Leave blank	Leave blank
Registration Mode registration_mode — enum	standard	standard	standard	standard
B — VISIT & ASSESSMENT (table: visits, visit_symptoms)				
Chief Complaint chief_complaint	Excessive thirst and frequent urination, generalised weakness, tingling in both feet	Loose watery stools 6–7 times a day, vomiting, low fever, child drinking less	Weakness, giddiness on standing, breathlessness on climbing stairs, very pale	On TB treatment — routine follow-up, mild cough, appetite improving
Symptom Duration symptom_duration_value + _unit	3 days (or 3 weeks → 21 days)	2 days	3 months	4 months
Medical History medical_history	Type 2 diabetes 9 years; hypertension 5 years; irregular with medicines 2 months	Immunisation up to date; no chronic illness; born full term	P2L2, LSCS 6 weeks ago; heavy bleeding after delivery; poor diet	Pulmonary TB diagnosed 02/05/2026; Intensive Phase completed; HIV non-reactive
Known Allergies known_allergies	None known	None known	None known	None known
Current Medications current_medications	Metformin, Telmisartan — taken irregularly	None	Iron tablets given at discharge, stopped after 1 week	FDC 3 tablets daily + Pyridoxine (NTEP)
C — VITALS (table: visit_vitals — enter exactly, these drive the triage engine)				
Temp °F / Pulse / BP temperature_f, pulse_bpm, bp_sys/dia	98.4 82 148 / 92	100.8 124 90 / 58	98.6 98 96 / 62	98.2 86 118 / 76
SpO ₂ / Resp. Rate / Glucose spo2_percent, respiratory_rate, blood_glucose_mgdl	97 18 216	98 28 84	99 20 92	96 18 102
D — DOCUMENTS TO UPLOAD (table: patient_documents — document_type enum)				
Upload at OCR step document_type	prescription → rx1 lab_report → lab1	prescription → rx2 lab_report → lab2	prescription → rx3 (handwritten) lab_report → lab3	prescription → rx4 lab_report → lab4
Expected Risk Tier risk_level — verify engine output	HIGH uncontrolled DM + Stage II HTN + renal involvement	MODERATE paediatric, dehydration, tachycardia	HIGH Hb 7.8, symptomatic, post-partum	LOW stable, on supervised treatment

Two things to check before the demo. **1.** Your patients table has **no preferred-language column** — preferred_language lives on staff_profiles, not on the patient. The problem statement lists preferred language as patient information, so a judge may ask. Either add it to patients before the demo or be ready to explain that language is currently held per operator. **2.** For an **EMERGENCY** tier demo, re-run Patient 3 with BP 84/54, pulse 126, SpO₂ 91 and complaint “fainted twice today, very breathless at rest” — this exercises the danger-zone path and the hospital-referral screen without adding a fifth patient.
